EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Pundsack on February 17, 2004.

The application has been amended as follows:

In the specification, page 1, line 2, --now US Pat No 6,645,374-- has been inserted after "2003,".

On page 1, line 3, --now US Pat No 6,558,549-- has been inserted after "2001,".

On page 1, line 8, --and-- has been inserted prior to "60/189,498".

On page 1, lines 8-10, "and Canadian Application Nos. 2,300,209 and 2,300,719" has been deleted.

2. The following is an examiner's statement of reasons for allowance:

While it is known in the art to provide a flexible element with an inner space for gas flow and a gas permeable but liquid water impermeable membrane with one or more conduits to transfer gas from the inner space to the atmosphere (see US Pat No 5,116,506 to Williamson et al.), and it is known in the art to make an element planar in shape (see US Pat No 5,482,859 to Biller et al.), in the examiner's opinion, the prior art fails to teach or fairly suggest the apparatus further comprising restraining members

Art Unit: 1724

having the recited positioning and operational elements or a weight to keep the members hanging vertically downwards.

While it is known in the art to provide an apparatus with a spacer and membrane forming an element with an inner space for gas flow, an inlet conduit and an outlet conduit (see Williamson et al.) and it is known to provide a planar element (see Biller et al.), in the examiner's opinion, the prior art fails to teach or fairly suggest the inlet and outlet conduits being placed on opposed sides of the planar element and extending along the sides of the element or a plurality of planar elements in communication with a first gas in a manifold.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fred Prince whose telephone number is (571) 272-1165. The examiner can normally be reached on Monday-Thursday, 6:30-4:00; alt. Fridays 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Blaine R. Copenheaver can be reached on (571) 272-1156. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
